Teacher Training

Program Proposal

From Routine to Learning Design

A Professional Development Series for **Creative Learning International Center**, Panglao

Prepared by

Ahmed Mahmoud Saeed Ahmed Ali

Humanities Educator | Author | Founder, Studio of Phronesis

October 2026

1. Introduction

Dear Ms. Amor, thank you for the opportunity to work with the teaching faculty at Creative Learning International Center. This proposal outlines a structured professional development program designed to elevate classroom practice from routine-based delivery to research-based learning design.

The program is grounded in established educational research: Bloom's Taxonomy (Bloom, 1956; revised by Anderson & Krathwohl, 2001), Webb's Depth of Knowledge framework (Webb, 1997, 2002), Marzano's New Taxonomy (Marzano & Kendall, 2007), the Understanding by Design framework (Wiggins & McTighe, 2005), and the Partnership for 21st Century Learning framework. It is also informed by my book, "Depth of Knowledge: A Practical Guide to Designing Rigorous Questions Without AI" (2026), and aligned to the Philippine Department of Education (DepEd) K to 3 Curriculum standards.

Trainer Profile

Ahmed Mahmoud Saeed Ahmed Ali is an Egyptian educator, philosopher, and author based in Bohol, Philippines. He holds a BA in Philosophy from Alexandria University and a Postgraduate Diploma in Education from Al-Azhar University. He is a UAE MoE Licensed Teacher with ADEK approval, and has taught across Grades 1–12 in the American Curriculum with subject mapping to IB MYP, Cambridge Global Perspectives, IB Theory of Knowledge, and A-Level Philosophy. He is the author of "Depth of Knowledge: A Practical Guide to Designing Rigorous Questions Without AI" (2026), available globally on Amazon. He is a member of the British Philosophical Association (BPA).

2. Current Practice & Diagnosed Gaps

Based on an interview with one of your faculty members, I mapped your current 3-hour daily routine against international standards for early childhood education (American Curriculum, 21st-century learning methodology, and DepEd Kindergarten to Grade 3 standards). The table below shows what is working well and where the gaps are.

Aspect	Current Practice (3-Hour Block)	Gap Identified	Research Basis
Daily Structure	3-hour block: play, exercise, prayer, lesson, assessment, snacks, multiple subjects	Routine-based, not lesson-plan-based. No written objectives, no time allocations per subject, no standards alignment.	Wiggins & McTighe (2005); Webb (2002)
Prior Knowledge Check	Verbal questioning only	No data collected. No tools (Plickers, flashcards). Cannot track who understood and who did not.	Ausubel (1968); Hattie (2009)
Formative Assessment	Verbal questioning only	No measurable evidence of learning. No documentation for parent reports or progress tracking.	Wiliam (2011); Webb (2002)
Cognitive Frameworks	None in use	Teachers do not know what cognitive level they are targeting (recall vs. application vs. reasoning). No Bloom's or DOK levels assigned.	Bloom (1956); Anderson & Krathwohl (2001); Webb (1997)
Differentiation	Not visible	No strategies for struggling learners, advanced learners, or diverse learning styles.	Tomlinson (2017); CAST (2018)
Technology Integration	None	No digital assessment tools. No use of Plickers, Kahoot, or interactive platforms.	P21 Framework (2019)
Cross-Curricular Links	None	No explicit connection to Philippine culture, society, or other subjects.	Brown, Collins & Duguid (1989)
Closure	Routine ends with snacks	No structured closure. No exit tickets. No reflection on what was learned.	Sousa (2011)
Classroom Management	Basic (organizing classroom)	No proactive behavior management framework. No transition strategies between subjects.	Marzano (2007)

The good news: your teachers already have strong instincts. They build engagement through play and games. They care about values. They use projects. What they need is a structured framework, grounded in research, that makes their teaching measurable, repeatable, and aligned to DepEd standards. That is exactly what this program delivers.

3. Program Overview

The program consists of 8 modules. Each module is 90 minutes. The recommended delivery is one module per week, allowing teachers to practice between sessions. However, modules can be compressed into a 2-day intensive if preferred.

#	Module	Focus	Research Foundation	Duration
1	Lesson Planning Fundamentals	Academic	Wiggins & McTighe (2005); Webb (2002); DepEd K to 3	90 min
2	Cognitive Frameworks for Early Childhood	Academic	Bloom (1956); Anderson & Krathwohl (2001); Webb (1997); Marzano & Kendall (2007)	90 min
3	Formative Assessment with Technology	Academic + Tech	Wiliam (2011); Webb (2002); Hattie (2009)	90 min
4	21st-Century Learning Methodology	Academic	P21 Framework (2019); CAST (2018)	90 min
5	Differentiated Instruction for Diverse Learners	Academic	Tomlinson (2017); CAST (2018)	90 min
6	Classroom and Behavior Management	Management	Marzano (2007); Sousa (2011)	90 min
7	Cross-Curricular and Real-Life Links (Philippines Context)	Academic	Brown, Collins & Duguid (1989); DepEd K to 3	90 min
8	Lesson Plan Clinic: Putting It All Together	Integration	All of the above	90 min

Recommended starting point: Module 1 (Lesson Planning Fundamentals). Every subsequent module builds on the lesson plan structure introduced in Module 1. Without this foundation, cognitive frameworks (Module 2) and assessment tools (Module 3) have no container to live in.

4. Training 1: Lesson Planning Fundamentals — Full 90-Minute Plan

Title

From Routine to Learning Design: The 16-Point Lesson Structure for the 3-Hour Block

Duration

90 minutes

Research Foundation

This training is grounded in:

- Bloom's Taxonomy of Educational Objectives (Bloom, 1956; Anderson & Krathwohl, 2001)
- Webb's Depth of Knowledge framework (Webb, 1997, 2002)
- Marzano's New Taxonomy of Educational Objectives (Marzano & Kendall, 2007)
- Understanding by Design (Wiggins & McTighe, 2005)

- Visible Learning (Hattie, 2009)
- Embedded Formative Assessment (Wiliam, 2011)
- DepEd K to 3 Curriculum Standards (Philippines, 2013)
- Ali, A. M. S. A. A. (2026). Depth of Knowledge: A Practical Guide to Designing Rigorous Questions Without AI.

Objective

By the end of this session, each teacher will have:

1. Mapped their current 3-hour routine and identified which segments are routines vs. learning activities
2. Written a learning objective using Bloom's action verbs, aligned to a DepEd K to 3 standard
3. Written observable, measurable success criteria using Webb's DOK levels
4. Allocated time across the full 3-hour block (180 minutes), including all subjects, transitions, and assessments
5. Received peer feedback using a research-based rubric
6. Understood the 16-point lesson structure and its research basis

Materials Needed

- Projector and screen
- Training PPT (provided by trainer, 15 slides with speaker notes)
- Printed worksheets: "Lesson Plan Builder" (4 pages per teacher, includes Bloom's verb table, DOK levels table, and peer-evaluation rubric)
- Printed reference handout: "16-Point Lesson Structure Explained" (1 page per teacher)
- Pens, highlighters, and colored markers
- Display copy of the book "Depth of Knowledge" (for reference)

Segment-by-Segment Breakdown (90 Minutes)

#	Segment	Time	Activity & Research Basis
1	Opening & Hook	5 min	Trainer introduction, book reference, humorous teacher-life icebreaker, session goals. Sets the tone: practical, not theoretical.
2	The Research Behind What We Do	10 min	Trainer presents the cognitive frameworks (Bloom's, DOK, Marzano) with their research origins. Teachers see that the structure is not invented; it is grounded in 60+ years of educational research. Citations: Bloom (1956), Anderson & Krathwohl (2001), Webb (1997, 2002), Marzano & Kendall (2007).
3	Diagnosis Activity	10 min	Teachers list their current 3-hour routine on the worksheet (Activity A). For each segment, they mark whether it is a routine or a learning activity, and whether it has a written objective. Discussion follows.
4	The 16-Point Structure Explained	15 min	Trainer walks through each of the 16 elements, explaining WHAT it means and WHY it matters (with research citations). Teachers follow along on the reference handout. Focus on: Learning Objectives (Bloom's), Success Criteria (DOK), Time Allocation (Marzano), and Slide Sequence (UbD).
5	Practice: Writing Learning Objectives with Bloom's	15 min	Teachers write one learning objective for their next lesson using the Bloom's verb table on the worksheet (Activity B). They assign the Bloom's level, check it against the self-check checklist, and get it reviewed by a partner. Trainer walks around and coaches.
6	Practice: Writing Success Criteria with DOK	15 min	Teachers write 2–3 success criteria for the same lesson using the DOK levels table on the worksheet (Activity C). They assign the DOK level, apply the Vague Test, and get it reviewed by a partner. Trainer walks around and coaches.
7	Practice: Time Allocation for the 3-Hour Block	10 min	Teachers plan the full 180-minute block on the worksheet (Activity D), allocating time to every segment including transitions, snacks, and multiple subjects. Total must equal 180 minutes. Trainer checks math.
8	Peer-to-Peer Evaluation	5 min	Teachers swap worksheets with a partner. Each evaluates the other's lesson plan using the rubric on the worksheet (based on Webb's alignment criteria, 2002, and Anderson & Krathwohl's taxonomy, 2001). Quick sharing of feedback.
9	Closure & Next Steps	5 min	Q&A. Homework: bring a completed 16-point lesson plan PPT to Module 2. Trainer closes with a humorous reflection on teacher life.

Expected Outcomes

- Each teacher understands the difference between a routine and a lesson plan (Wiggins & McTighe, 2005)
- Each teacher can write a learning objective using Bloom's action verbs (Anderson & Krathwohl, 2001)
- Each teacher can write observable, measurable success criteria aligned to DOK levels (Webb, 2002)
- Each teacher can allocate time across a full 3-hour block (180 minutes)
- Each teacher has a draft lesson plan ready to convert into a PPT
- The faculty has a shared vocabulary and structure for all future lessons
- The faculty understands the research basis for each element of the lesson plan

5. Modules 2–8: Overview

Each subsequent module follows the same format: 90 minutes, hands-on, with worksheets and peer evaluation. Below is a summary of each, with its research foundation.

Module 2: Cognitive Frameworks for Early Childhood

Focus: Bloom's Taxonomy (1956, revised 2001), Webb's DOK (1997, 2002), and Marzano's New Taxonomy (2007), simplified for ages 2–8.

Outcome: Teachers can assign the correct cognitive level to every activity and question in their lesson plan, and explain why that level is appropriate for the age group.

Module 3: Formative Assessment with Technology

Focus: Plickers setup and use, creating printable cards, designing 5-question checks, replacing verbal-only assessment with data-driven assessment. Based on Wiliam (2011) and Hattie (2009).

Outcome: Teachers can run a Plickers formative assessment and read the data to adjust instruction.

Module 4: 21st-Century Learning Methodology

Focus: Critical thinking, collaboration, inquiry-based learning, communication protocols, embedded in the existing routine. Based on the P21 Framework (2019) and CAST UDL Guidelines (2018).

Outcome: Teachers can embed at least two 21st-century skills into each lesson plan.

Module 5: Differentiated Instruction for Diverse Learners

Focus: Scaffolding for struggling learners, extensions for advanced learners, supporting English language learners. Based on Tomlinson (2017) and CAST (2018).

Outcome: Teachers can plan three tiers of support for any activity in their lesson.

Module 6: Classroom and Behavior Management

Focus: Proactive behavior management, routines and procedures, positive reinforcement, transition strategies for the 3-hour block. Based on Marzano (2007) and Sousa (2011).

Outcome: Teachers have a written behavior management plan for their classroom.

Module 7: Cross-Curricular and Real-Life Links (Philippines Context)

Focus: Embedding Philippine culture, values, and society into lessons. Cross-curricular connections. Real-life application slides. Based on Brown, Collins & Duguid (1989) and DepEd K to 3 curriculum.

Outcome: Teachers can design a cross-curricular link slide for any lesson topic, specific to the Philippine context.

Module 8: Lesson Plan Clinic — Putting It All Together

Focus: Each teacher builds a complete lesson using all frameworks. Peer review. Feedback. Final polished PPT ready for classroom use.

Outcome: Each teacher has a finished, reviewed, classroom-ready lesson plan PPT.

6. Investment & Logistics

To be discussed.

What Is Included

- Training PPT (custom-designed for your center, 15 slides with speaker notes)
- Worksheets for each teacher (4 pages, includes Bloom's verb table, DOK levels, and rubric)
- Printed reference handout (16-point structure explained with research citations)
- Peer-evaluation rubrics (based on Webb, 2002, and Anderson & Krathwohl, 2001)
- Blank PPT lesson template (16-point structure) for teachers to reuse
- Follow-up support via email for 2 weeks after each module

What Is Not Included

- Printing of the worksheets
- Projector and screen (to be provided by the center)
- Printing of worksheets (can be arranged at cost)
- Food and refreshments

Scheduling

Modules can be delivered weekly (one per week for 8 weeks) or as a 2-day intensive (4 modules per day). The weekly format is recommended because it allows teachers to practice between sessions and bring real questions to the next module.

Venue

Training is delivered on-site at Creative Learning International Center, Panglao. A room with a projector, screen, and seating for all teachers in a workshop arrangement (tables, not rows) is required.

Next Steps

1. Review this proposal and confirm which modules you would like to proceed with.
2. Confirm the number of teachers who will attend.
3. Select a date for Module 1.
4. I will prepare all materials and deliver the first session.
